Khushboo Kumari

Java Backend Developer

PROFESSIONAL SUMMARY

A self-disciplined and result-oriented Java backend developer with a solid foundation in programming, technical expertise in Java, SQL, Spring, and Spring Boot. Looking forward to working with a progressive organization with opportunities to work on significant projects.

PROJECTS

1. MODESENS | |

HTML | CSS | JavaScript

- Developed a responsive web application using HTML, CSS, and JavaScript
- Implemented home, sale page, and various category filters for men, beauty, and community pages
- Integrated a cart summary functionality for a seamless shopping experience

2. UP-SKILL | |

HTML | CSS | JavaScript

- Designed and developed a web application using HTML, CSS, and JavaScript for upskilling individuals.
- Implemented features such as home page, admission page, cart page, and user authentication.
- Incorporated search functionality and sorting to enhance user experience.
- Ensured responsiveness across different screen sizes and optimized the application for performance.

3. Amusement park | |

Java | MySQL | Spring Boot | Spring Security | Hibernate | Lombok

- Developed a Spring Boot-created REST API for an amusement park management system
- Implemented user registration, login/logout functionality for users
- Designed and implemented features for the Customer, Ticket, and Activity modules
- Utilized Spring Security for authentication and authorization
- Integrated Swagger UI for API documentation
