Khushboo Kumari

Java Backend Developer

PROFESSIONAL SUMMARY

A self-disciplined and result-oriented Java backend developer with a solid foundation in programming and technical expertise in Java, SQL, Spring, and Spring Boot. Looking forward to working with a progressive organization with opportunities to work on significant projects.

PROJECTS

1. Online Shopping Application | 🌐 | 🛒

- Developed a RESTful API using Spring Boot and Java for an online shopping application.
- Designed features for vendors to register accounts, enabling them to add and manage products on the platform.
- Implemented cart functionality for customers to add, remove, and manage products.
- Managed user authentication and authorization with Spring Security.
- Integrated Swagger UI to facilitate comprehensive API documentation and testing.
- Completed as an individual project in 5 days.

2. Amusement Park | 🌐 | 🎡

- Developed a Spring Boot-based REST API for an amusement park management system.
- Users can register, log in, view available activities, book tickets, access billing details, and cancel tickets.
- Admins can create, update, delete, and view rides and update customer details.
- Designed and implemented features for the Customer, Ticket, and Activity modules.
- Integrated Swagger UI for comprehensive API documentation and testing.
- Utilized Spring Security and JWT authentication for robust authentication and authorization.
- Completed as a collaborative project by a team of three members in 5 days.
